

Bastion & Flowe coding test

Create a headline scrolling information ticker. Eg.

appy Pride Month All!! 🏳️‍🌈 Book all outstanding campaiings Provide feedback on the Lev

The source of the information for the ticker will be a google sheet. Eg.

	A	B	C
3	Happy Pride Month All!! 🏳️‍🌈		
4	Book all outstanding campaiings		

Individual lines in the google sheet will represent the items appearing on the ticker. You will need to obtain an API key from a GCP project with the Google sheets API enabled, to facilitate access to the spreadsheet API. Additionally you will need to obtain the spreadsheet ID of the Google sheet doc, to facilitate access to the sheet with the information.

The solution provided will be delivered as an HTML form. You may implement this using HTML, CSS, javascript, open source external packages or any other way you deem fit.

Please upload the solution to Google Drive, and provide access.
